- *Fully loaded coding (out of box)*
- *Standard Process RX*
- *Notes On Hold & Chart Swap*
- *Highlighted Findings*
- *In-Office Chat Room*

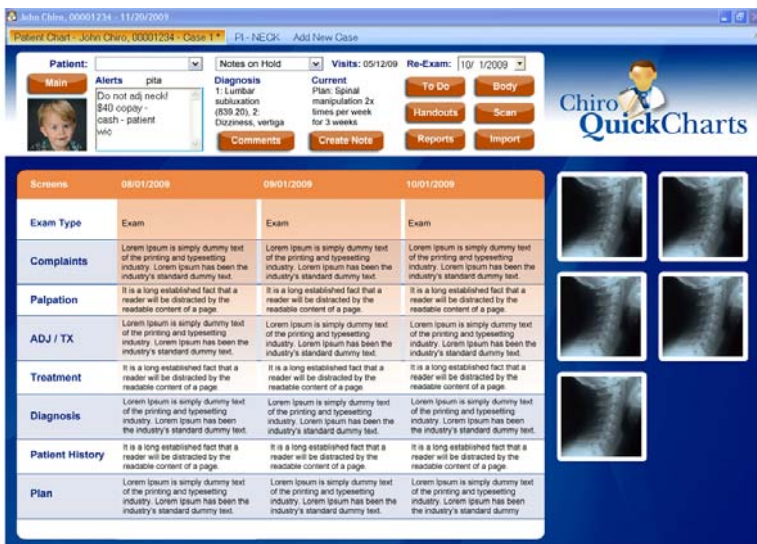

Never has there been a better or faster way to do patient notes.

Have a paperless office with Chiro QuickCharts. From the moment a new patient walks in the door you will enjoy the benefits of our paperless check-in system. Patients enter past medical history and then enter daily subjective info on every subsequent visit.

Better manage the flow of patients as they move through your practice with our patient tracking. See where patients are located and chat with office staff without being interrupted.

See 5 past visits with our Travel-Card Patient Chart. Enjoy the benefits of seeing all the needed data (plan, diagnosis, last exam, etc). Then simply create today's visit in just seconds and get out of the office you're your last patient leaves!
